

First Name: S Dinesh

Last Name: Kumar

Total Experience: 3.1 Years

Email: dineshkumarnavarasam@gmail.com

Phone (IND): 9524060963

Carrier Objective:

I am passionate about using my experience to contribute effectively to projects while continuously seeking opportunities to expand my expertise. Eager to take on new challenges, I am committed to making a positive impact in my next role, where I can showcase my skills, grow my knowledge.

My Portfolio:

With the use of github.io web page I've created my portfolio.

Link: <https://dineshthalapathy01.github.io/my-portfolio/> - last updated at 26/05/2026

Project Experience Summary:

- **3rd – 4th Year Academic Project:** - 2021 - 2022
 - **Application:** SMART TRAVELLERS APP developed using flutter (Dart) in 2021.
 - **Key skills:** Flutter, Dart, Firebase, Google Cloud.
 - **Responsibilities:**
 - Developed a mobile application using Flutter (Dart) for smart travel planning and user assistance.
 - Integrated Firebase and Google Cloud services for authentication and backend support.
 - **Paper Publication:** IJSART – <https://ijsart.com/smart-travelers-app-using-flutter-52296>
- **MPHASIS THE NEXT APPLIED** - April 2023 – December 2024

Designation: - Software Engineer

TRAINING PERIOD (6 Months)

Role: - Java Full Stack Developer

Duration: - 12th April 2023 – 30th September 2023

Technologies & Topics

- Core Java, Spring Boot, Spring Framework
- Angular 16/19, RESTful APIs, Microservices
- Maven, File Handling, JUnit
- HTML5, CSS3, JavaScript, Bootstrap
- Selenium, Jenkins

Talent Next Certified Skill:

- Java Microservices
 - Relational Databases
 - AWS Technical Essentials
 - Programming Fundamentals
 - GitHub Copilot Essentials
-

PROJECTS WORKED:

Application: **REGRESSION TESTING TOOL**

Client Name: **FEDEX**

Working Period: **March 2024 – July 2024**

Location: **DLF IT PARK CHENNAI**

Role: Full Stack Developer

Responsibilities:

- Developed a web-based regression testing management application using Java, HTML, CSS, and JavaScript.
 - Implemented file management functionalities for copying, retrieving, tracking, and processing regression testing files.
 - Built backend functionalities for handling primary and secondary entity data processing with database update and insert operations.
 - Developed secure session handling mechanisms with authentication-based user redirection.
 - Automated scheduled tasks for data insertion and file processing activities.
 - Developed REST endpoints for efficient dataset retrieval and processing.
 - Implemented Excel export functionality with formatting and color-based result indicators.
 - Integrated logging and user feedback mechanisms for monitoring application activities and operations.
-

Application: **CHATBOT APPLICATION**

Client Name: **FEDEX**

Working Period: **June 2024 – September 2024**

Location: **DLF IT PARK CHENNAI**

Role: Full Stack Developer

Responsibilities:

- Developed a chatbot-based web application using Java, Thymeleaf, HTML, CSS, and JavaScript.
- Implemented dynamic file filtering, viewing, and table-based file management functionalities.
- Developed URL shortening functionality for generating clickable and user-friendly short links.
- Integrated content moderation filters for restricting inappropriate language and maintaining user interaction quality.
- Implemented dynamic time-based welcome messages for improved user engagement.
- Utilized Git for version control, project collaboration, and source management.

- **EAGLE SOFTWARE INDIA PRIVATE LIMITED - JANUARY 2025 – at Present**

PROJECTS WORKED:

Application: **BIHAR BUILDING & OTHER CONSTRUCTION WORKERS WELFARE BOARD (BBOCW)**

Current Application Status: LIVE – bocwboard.bihar.gov.in

Client Name: **Government of BIHAR**

Working Period: **Jan 2025 – May 2026**

Client Location: **Patna, Bihar (Remote)**

Office Location: **Eagle Tower, Chennai**

Role: **Full Stack Developer**

Responsibilities:

- Developed and maintained multiple modules for a large-scale Bihar Government labour welfare portal using Angular 16, Spring Boot, Java, and PostgreSQL.
- Worked on enterprise modules including:
 - Profile Update
 - Application Renewal
 - Payment Gateway
 - RBAC Management
 - CMS
 - DMS
 - Chatbot Integration
- Contributed to a government welfare platform serving 35+ lakh registered workers across Bihar state.

AADHAAR & BIOMETRIC INTEGRATION:

- Implemented **Aadhaar** OTP, **Aadhaar** e-KYC, and **Aadhaar** Biometric authentication integrations.
- Integrated RD Service biometric devices including **Mantra** and **Morpho** devices.
- Developed backend processing mechanisms for handling UIDAI/vendor API biometric authentication responses.

SECURITY & BACKEND DEVELOPMENT

- Implemented Spring Security with JWT Authentication, Refresh Tokens, CAPTCHA validation, Encryption, and Decryption mechanisms.
- Ensured all payment calculations, validations, and business logic were securely handled within backend services.

MODULE DEVELOPMENT

- Developed Profile Update module using Angular Reactive Forms integrated with Spring Boot REST APIs and JPA persistence.
- Built Application Renewal workflows with approval processes, file uploads, and role-based access handling.
- Integrated secure Payment Gateway processing with receipt generation and transaction logging.
- Designed RBAC architecture including Geo x User x Role Mapping and Role x Menu Mapping.
- Developed CMS modules supporting multilingual interfaces and dynamic filtering.
- Built secure DMS functionalities with file validation and PostgreSQL storage integration.
- Developed chatbot functionalities for dynamic user interactions using Angular and REST APIs.

DATABASE & DEPLOYMENT

- Managed optimized database design with PK mapping, indexed queries, and referential integrity handling.
- Collaborated with a team of 8 developers for frontend/backend integration using REST APIs and Git workflows.
- Worked on Docker-based deployment and client coordination activities with Bihar Government teams.

PERFORMANCE & SECURITY

- Implemented audit logging, secure validation mechanisms, and role-based authorization systems.

- Optimized backend performance using indexed queries and caching mechanisms.

Application: **TAMILNADU AND CIVIL SUPPLIES CORPORATION (TNCSC)**

Application Status: Partially LIVE - <http://e2e-tncsc.com/>

(User Management & Access Control Modules in Production)

Client Name: **Government of TAMILNADU**

Working Period: **July 2025 – Present**

Client Location: **Chennai**

Office Location: **Eagle Tower**

Role: **Full Stack Developer**

Responsibilities:

- While working in BBOCW Project, additionally joined TNCSC Project as an additional core development resource from July 2025 onwards, developing enterprise government application modules using Angular 19/20, Java 17 Spring Boot, PostgreSQL, and RESTful Microservices architecture.
- Collaborated with Eagle Software India Pvt Ltd (Affiliated with Madras Security Printers) and Xenovex in jointly developed TNCSC enterprise application modules.
- Successfully developed and deployed User Management, Menu Management, and Role Menu Mapping modules in LIVE production environment hosted on GCP (Google Cloud Platform).
- Developed **RBAC** (Role-Based Access Control) architecture supporting 16,000+ TNCSC employees across Tamil Nadu regional offices, head office operations, and field-point employee management.
- Developed and maintained multiple enterprise modules including:
 - User Management
 - Menu Management
 - Role Menu Mapping
 - Workflow Configuration Master
 - Payroll Master Modules
 - Loan Management Modules
 - EDLI/FBF Modules
- Implemented secure authentication and authorization architecture using Spring Security with:
 - JWT Access Token
 - Refresh Token

- Role-Based Access Control (RBAC)
 - Dynamic Authorization Processing
- Developed dynamic menu rendering and access control mechanisms based on role-menu mapping configurations and workflow-based authorization.
- Designed scalable master-driven access configuration supporting:
 - Multi-Role Employee Access
 - Workflow-Based Authorization
 - User-Group Mapping
 - Office User & Field Point User Management
 - Region-Level Authorization
 - Developed complete User Management functionalities including:
 - User Creation
 - User Edit
 - Multi-Role Mapping
 - User Role Deletion
 - Dynamic Role Assignment
 - User List Management
- Integrated Employee Digitization application data with User Management modules to automatically fetch and reflect employee service history, profile information, and organizational mappings.
- Implemented **AADHAAR INTEGRATION** features including:
 - **AADHAAR OTP Verification**
 - **AADHAAR e-KYC Validation**
 - **Secure Employee Identity Verification**
- Developed Gateway-based authentication architecture using separate microservices:
 - TNCSC Gateway Service
 - TNCSC Core Application Service
- Implemented dynamic IRL-based Role Switching mechanism enabling employees with multiple roles to switch authorization context within the same logged-in session.
- Designed and implemented dynamic Workflow Configuration Master setup enabling configurable approval flows across all enterprise modules.
- Developed Loan Management Module supporting:
 - Self-Loan Application
 - Officer-Initiated Loan Processing
 - Refundable Loan (R.L)
 - Non-Refundable Loan (N.R.L)
- Implemented Aadhaar OTP mandatory verification for employee self-loan submission workflows, while officer-created loans were processed through secured administrative approval mechanisms.

- Developed backend business logic handling:
 - o Loan Eligibility Calculation
 - o Instalment Planning
 - o Retirement-Based Adjustment Calculation
 - o Savings-Based Loan Limit Validation
- Implemented secured financial business rules where:
 - o Refundable Loans allow employees to avail up to 75% of eligible savings balance.
 - o Non-Refundable Loans maintain minimum balance validation before eligible withdrawal processing.
- Developed enterprise approval workflows supporting:
 - o Regional Office Approval
 - o Head Office Approval
 - o Accounts Section Final Approval
- Integrated approved loan schedules with payroll processing and payslip planning workflows.
- Developed EDLI/FBF modules for employee insurance processing and beneficiary claim management systems.
- Implemented automated SMTP-based email workflow integration for document submission and approval communication processing.
- Developed backend-controlled amount calculation systems ensuring secured financial validation and prevention of frontend-level value manipulation.
- Implemented beneficiary claim processing logic with declaration-based eligibility validation and dynamic amount calculation workflows.
- Developed master-driven insurance and family benefit disbursement calculation systems with secured backend validation.
- Ensured all critical financial calculations, workflow validations, approval processing, and authorization controls were securely handled within backend services.
- Worked on GCP-hosted UAT deployment support, environment validation, and enterprise application testing workflows

Experience Summary:

- Strong experience in Java/J2EE technologies for developing scalable enterprise and government-based web applications.
- Hands-on experience in developing secure and dynamic applications using Core Java, Java 17, Spring Boot, Spring Framework, Spring MVC, Hibernate, JPA, and Java Microservices architecture.
- Experienced in building RESTful web services and backend APIs using Spring Boot with secure authentication and authorization mechanisms.
- Worked extensively on enterprise authentication systems using Spring Security, JWT (Access Token & Refresh Token), CAPTCHA validation, encryption, and role-based access control (RBAC).
- Good experience in frontend development using Angular (16, 19, 20), HTML5, CSS3, JavaScript, Bootstrap, and reactive forms integration with REST APIs.
- Developed and maintained government workflow-based applications with dynamic approval configurations, master setups, and multi-role access management.
- Experience in implementing Aadhaar Integration features including Aadhaar OTP, Aadhaar e-KYC, and Aadhaar Biometric authentication with UIDAI and RD Service integrations.
- Strong knowledge in database design and management using PostgreSQL, Oracle, and MySQL with JDBC, JPA, indexed queries, and performance optimization.
- Experience in developing microservice-based architecture with separate Gateway and Core Service implementations for secure enterprise applications.
- Worked on workflow-driven financial modules including Loan Processing, Payroll Support, EDLI/FBF Beneficiary Systems, and Approval Management Systems.
- Hands-on experience in GCP-hosted UAT and LIVE application deployment support and environment handling.
- Experience in developing secure file handling and DMS (Document Management System) modules with backend validation and storage processing.
- Worked with Thymeleaf for server-side rendering and dynamic UI generation in Spring Boot applications.
- Good experience with Git, GitHub, and version control workflows for collaborative development and code management.
- Experience working in Agile team environments, client coordination meetings, and enterprise-level application development.
- Strong practical knowledge in AI-assisted development and prompt engineering using tools such as GitHub Copilot, OpenAI Codex, and Amazon Q for improving productivity, debugging, logical implementation, and faster application development.
- Skilled in converting business requirements into optimized backend logic, workflow structures, and scalable application architecture.

Computers Worked on:

Computer system	Programming Languages	Special software
Windows 10,11	Spring Boot Java (8[1.8], 17), Java Microservices, Spring boot, Framework, spring MVC, HTML, CSS, JavaScript, Angular (16,19,20), Restful Webservice, Hibernate, JPA, Apache Tomcat	STS 4, Vs Code, Postman, IntelliJ, Eclipse, CITRIX, MYSQL, Oracle, POSTGRES
Windows 10,11	Flutter, Dart	Android Studio, VS code

Education Details:

s.no	Qualification /Degree	Institution	University	Year of Completion	%
1.	SSLC	Navarasam Matriculation Higher Secondary School	State Board of Tamil Nadu	2016	84
2.	HSC	Navarasam Matriculation Higher Secondary School	State Board of Tamil Nadu	2018	62
3.	B.E - EEE	Nandha Engineering College	Anna University, Chennai	2022	8.59 CGPA

Personal Details:

Date of birth	-	03/05/2001
Nationality	-	Indian
Native District	-	Erode
Residency District	-	Chennai
Passport	-	Available
Disability	-	No
